

## Give any device a voice with “gigaaa Inside”

**gigaaa** is a new multilingual **AI Personal Assistant** that enriches people’s lives by making everyday tasks simpler. It represents **a new alternative in a market dominated by Google Assistant and Amazon Alexa**, both for enterprises and consumers. Users can access gigaaa AI Personal Assistant via various “gigaaa Inside” devices. At IFA 2019 gigaaa is presenting a premium Smart Mirror among other devices like Smart TVs, watches and loudspeakers with “**gigaaa Inside**”.

Currently, gigaaa AI Personal Assistant is available in *German, English, Turkish, Russian,* and *Arabic* language with many more languages coming in the next few months. By speaking with gigaaa you get **easy access to hundreds of digital services** to look up information, ask for advice, purchase products, operate Smart Home Systems, expand your social network, communicate with people and much more.

gigaaa is a European startup, consisting of a team of futurists from all around the world who share the same enthusiasm to **build an AI life companion for everyone**. Gartner market research mentions gigaaa in several reports as a competitor to Google, Amazon, Microsoft, Apple, and Samsung for Conversational UX Technology. Thanks to its data policy, gigaaa offers consumers with privacy concerns a better choice. **It is the first AI Personal Assistant with full transparency** when it comes to data protection and privacy.

With “**gigaaa Inside**” solutions, you can give watches, mirrors, speakers, TVs and all kinds of other devices a voice that makes them smart. Innovative solutions for developers will make the gigaaa system grow faster than any other Personal Assistant technology in response to the demands of companies that want to market their services and products with smart and creative conversational UX. **None of the competitor systems are as easy to expand and customize as gigaaa Console for voice services**. With its secured data policy, simple voice service development and fast integration process, gigaaa is the better choice for enterprises entering the voice commerce market, because enterprises will find a neutral technology provider (Your customer-Your data) as well as saving time and money when creating their own voice service content for any type of business.
